VENTURE CAPITAL · SEED TO GROWTH · EUROPE

Where pure vision directs recursive AI.

Seed to Growth. €100M.

We don't fund headcount. We back tight-knit, AI-native teams building self-improving systems across the world's largest markets.

✓ EuVECA fund, Luxembourg

PRE-MARKETING PHASE

This document is a pre-marketing communication within the meaning of Article 4a of Regulation (EU) No 345/2013 (EuVECA). The fund is not yet established and no units may be subscribed at this stage. For professional and eligible investors only.

THE MANIFESTO

The end of human friction.

For two centuries, scaling a company meant scaling human labor, hiring thousands of people to execute the vision of one. That era is over.

Today, a tight-knit team that knows how to challenge, direct, and iterate with AI can architect an integral, self-improving system in record time. AI frees humanity from mechanical execution, returning creation to pure thought.

The future doesn't belong to the largest organizations. It belongs to the clearest minds directing the most autonomous machines.

WHAT WE BACK

Four laws drive our thesis and our Deal Engine every morning.

01

Visionary founders

We back obsessive visionaries from Day 1. Founders who don't build org charts, but iterate directly with AI until the machine mirrors their exact ambition.

02

Self-improving systems

We look for closed-loop architectures. Products that don't just automate a task, but compound in intelligence, precision, and autonomy with every single run.

03

Maximum impact. Minimum headcount.

We invest in integral systems solving massive, painful problems in the world's largest markets, operated with near-zero marginal labor.

04

Fund-returning physics

Every check we write backs a company built to dominate its category globally and return our entire €100M fund.

FUND CONSTRUCTION

Two ways in at every layer: direct entries in top rounds, and our own breakouts.

1 LAYER 1 **Seed**

€100K–€1.5M

initial ticket, pro-rata reserved

STAGE	Pre-seed / seed
ROLE	Lead + radar tickets
ENTRY POST	€5M–€20M
COMPANIES	10 leads + 40 radar
INVESTED	€16.5M
TARGET GROSS	6.8× MOIC

+

2 LAYER 2 **Venture**

€1.5M–€5M

initial ticket, pro-rata reserved

STAGE	Seed+ / Series A
ROLE	Direct, at the inflection
ENTRY POST	€25M–€80M
COMPANIES	8 direct entries
INVESTED	€34.4M
TARGET GROSS	3.3× MOIC

+

3 LAYER 3 **Growth**

€5M–€10M

from the fund, up to €15M with SPVs

STAGE	Series B and beyond
ROLE	Direct + our breakouts
ENTRY POST	€80M–€400M
POSITIONS	3 direct + 3 follow-ons
INVESTED	€33.0M
TARGET GROSS	3.1× MOIC

=

€100M
Target Fund I, closed-ended, closings over 24 months

3 layers
Seed, Venture, Growth: €100K to €10M per company

Every
European seed round tracked by the Seed Radar, weekly

6–18mo
Detection lead before announcement

OUR EDGE

Two autonomous AI engines.

We run on what we back.

The Deal Engine

Follow live deal flow →

Scores every company against our thesis and flags inflection points before they become consensus. Autonomously detects the right targets for our portfolio companies.

POWERS ProFund · Proplace · Portfolio companies

The Growth Engine

Autonomous AI agents running content, inbound, and outbound end-to-end. They operate our fund and companies today and can be plugged directly into the founders we back tomorrow.

POWERS ProFund · Proplace · Maximum Insurance · Sosuites · Portfolio companies

KEY TERMS

Closed-ended EuVECA fund (Lux.)	**10 years**
Successive closings	**24 months**
Management fee, years 1–5	**2%**
Then, on invested capital	**1.5%**
Carried interest, European	**20%**
Hurdle, with GP catch-up	**8%**
Per company: fund / with SPVs	**€10M / €15M**

CAPITAL ALLOCATION

Seed – 50 companies	**€16.5M**
Venture – 8 companies	**€34.4M**
Growth – 3 direct + 3 follow-ons	**€33.0M**
Invested (40% in follow-ons)	**€83.9M**
Management fees	**€12.1M**
Fund expenses, incl. set-up	**€3.9M**
Contingency	**€100K**
Total commitments	**€100.0M**

THE GP

Alexandre Busson

Founding Partner

- M&A Director, Leboncoin
- Senior Associate, Partech Ventures
- LBO Analyst, Ardian (ex-AXA PE)
- Key Account Manager assistant, Google
- Founder / Investor, Dreamzer Games
- Owner and CEO, Fadparis.com

TRACK RECORD, PRIOR TO THE FUND

Deal-01 – exited 2007 — **10.0×**
Entry 2006, 100% owned. Full exit in 2007.

Deal-02 – exited 2014 — **20.0×**
Entry 2008 at 100%. Sold down to 40%, then full exit in 2014.

Deal-03 – LBO exit 2025 — **19.0×**
Seed ticket €200K at €5.3M in 2014. LBO exit in Feb 2025 at €100M. Sourced 14 months before public announcement.

Deal-04 – acquired 2016
100% acquisition, €45M buyout. Revenue growing ~20% YoY since acquisition.

Companies anonymised. Names and references on request.

PROOF OF WORK

We live what we back.

ProFund and the companies below are operated almost entirely by our in-house engines and agents:

Proplace
Autonomous AI operating system for corporate development & M&A.

MAXIMUM INSURANCE
Travel insurance and duty of care for companies and their teams abroad.

SOSUITES.
AI-assisted personalised art prints to share.

Seed: S-01 to S-10 are lead or co-lead tickets (€500K–€1.5M), S-11 to S-50 radar tickets (€100K–€150K) with pro-rata only in the companies that take off. Positions with a company in brackets are follow-ons in our own breakouts; the direct growth entries are made alongside leading growth funds, with a liquidation preference. * Fund return shown at exit value. In the fund model, 25% of this position is sold in a year-6 secondary at 60% of its exit value (see Fund Performance).

FUND PERFORMANCE

Target returns, built line by line.

Net of fees, expenses and carry

METRIC	Target	Base	Stress
Fund size	€100M	€100M	€100M
Gross exit value	€326.6M	€193M	€118.1M
Year-6 secondary discount	–€16.6M	–€5.8M	–€3.0M
Net TVPI	2.7×	1.7×	1.2×
Net IRR	26%	14%	4%
Net DPI by year 6	0.9×	0.6×	0.5×
Gross MOIC · Seed	6.8×	3.9×	2.6×
Gross MOIC · Venture	3.3×	2.2×	1.4×
Gross MOIC · Growth	3.1×	1.6×	0.9×

26%
Target net IRR
Base case 14% with no exit above €500M.

2.7×
Target net TVPI
Base case 1.7×, stress case 1.2×.

0.9×
Net DPI by year 6
Partial secondaries on our winners return capital early.

1.0×
One fund returner
S-01 returns the fund across its Seed and Growth lines.

Full fund model (Excel)
On request · alexandre@profund.vc

Net = after management fees (2% on commitments for 5 years, then 1.5% on invested capital), fund expenses and carried interest (20% over an 8% hurdle, European whole-of-fund waterfall with GP catch-up), before tax. The target assumes one fund returner (S-01, returning 1.0× the fund across its Seed and Growth lines) and a year-6 secondary sale of 25% of the two largest winners at 60% of their exit value. Base caps every exit value at €500M, Stress at €250M; everything else is unchanged. Targets are model outputs, not a forecast or a guarantee.
