

# ProFund builds and invests in AI-native companies

Early-stage venture capital. Paris first, then Europe.

## PRE-MARKETING PHASE

This document is a pre-marketing communication within the meaning of Article 30a of Directive 2011/61/EU (AIFMD). The fund is not yet established and no units may be subscribed at this stage. Addressed to professional investors only.

## IN ONE SENTENCE

A EUR 35M co-invest fund. Seed with traction and Series A, alongside a Tier 1 lead. Operators who built companies first. A platform that reads every weak signal in an emerging category, six to eighteen months before it is obvious. Pre-seed without traction stays in detection - it is not where the fund deploys.

**EUR 35M**

Target fund size, incl. reserves

**9 + 12**

Core co-invest (the fund) +  
Scout options

**Not lead**

Seed traction / Series A, next to  
a Tier 1

**6-18mo**

Detection lead before  
announcement

## FUND CONSTRUCTION

Core is the fund: nine co-invest tickets at Seed with traction and Series A. Scout is the option: twelve small tickets where the detection lead is worth the most. The best Scout bets graduate to Core. We do not lead the round.

### CORE PORTFOLIO

**EUR 1.1M** per deal, 9 deals

- Seed with traction / Series A, entry at EUR 25M - 35M pre-money.
- EUR 9.9M initial + EUR 14M follow-on reserved.
- Co-investing alongside Tier 1 leads.
- Target 3.1x MOIC - EUR 74.9M exit value.

### SCOUT PORTFOLIO

**EUR 150K** per deal, 12 deals

- Pre-seed detection capital, entry at EUR 4M - 6M post-money.
- EUR 1.8M initial + EUR 7.5M follow-on reserved.
- 3 of 12 graduate to Core at Seed+ validation.
- Target 2.5x MOIC - EUR 23.7M exit value.

## STRATEGY

- Paris first, then Europe. Core capital: Seed with traction and Series A, as co-investor.
- Digital + human on one platform. Every signal is processed automatically. Human time is reserved for the top 1% (CALL). The reason every other signal was discarded is written down. Thesis parameters are recalibrated every Monday.
- The same engine already books meetings for Proplace and Maximum Insurance - two operating companies in the portfolio. Proof, not a slide.
- A full investment memo and financial model are generated automatically for every high-conviction match. Fund administration fully externalised.
- 5% GP commitment on management fees. No investment committee on Scout decisions - one person accountable.

## HOW WE SOURCE

Every signal is matched against the active themes, then qualified automatically against dozens of green and red flags weighted by their historical predictive accuracy. Only the top 1% surfaces as a CALL - the single verdict that requires human attention. Pre-seed without traction stays in detection. Outbound is reserved for Seed with traction and Series A.

- SSL certificate registrations, Pappers legal filings, GitHub repositories.
- LinkedIn job posts, Crunchbase API, semantic search, Google Alerts.
- VC portfolio additions and grandes ecoles alumni networks.
