Where pure vision directs recursive AI.

Pre-seed to Growth. €100M.

We don't fund headcount. We back tight-knit, AI-native teams building self-improving systems across the world's largest markets.

> **One round. Then never diluted again.** One equity round per company, then loans and buybacks: founders own more at every stage, and so do our LPs.

✓ EuVECA fund, Luxembourg

PRE-MARKETING PHASE

This document is a pre-marketing communication within the meaning of Article 4a of Regulation (EU) No 345/2013 (EuVECA). The fund is not yet established and no units may be subscribed at this stage. For professional and eligible investors only.

THE MANIFESTO

The end of human friction.

For two centuries, scaling a company meant scaling human labor, hiring thousands of people to execute the vision of one. That era is over.

Today, a tight-knit team that knows how to challenge, direct, and iterate with AI can architect an integral, self-improving system in record time. AI frees humanity from mechanical execution, returning creation to pure thought.

The future doesn't belong to the largest organizations. It belongs to the clearest minds directing the most autonomous machines.

Capital is no longer scarce. Ownership is. A team that doesn't need an army doesn't need a round every 18 months. So we don't sell it one: we invest once, then we lend and we buy.

WHAT WE BACK

Four laws drive our thesis and our Deal Engine every morning.

01

Visionary founders

We back obsessive visionaries from Day 1. Founders who don't build org charts, but iterate directly with AI until the machine mirrors their exact ambition.

02

Self-improving systems

We look for closed-loop architectures. Products that don't just automate a task, but compound in intelligence, precision, and autonomy with every single run.

03

Maximum impact. Minimum headcount.

We invest in integral systems solving massive, painful problems in the world's largest markets, operated with near-zero marginal labor.

04

Fund-returning physics

Every check we write backs a company built to dominate its category globally and return our entire €100M fund.

HOW WE BACK THEM

The founders' pact.

The same for every company, and public.

- ✓ **One round.** We invest once in new shares, then never create a new share while the founder grows with us.
- ✓ **A reserved loan line.** Hiring, go-to-market, working capital, acquisitions, drawn in tranches. No more fundraising.
- ✓ **Buybacks and cancellations.** We buy out angels, leavers and early funds, with the founder's agreement, and the company cancels shares every year. Founder and fund own more at every stage.
- ✓ **Founder control.** Our shares vote with the founder. No board seat, no veto, no veto on a sale.
- ✓ **Fair both ways.** If a founder raises elsewhere, we can follow or lead the round in new shares.

FUND CONSTRUCTION

Two ways in at every layer: a first equity cheque, or a buyback of existing shares. Then loans, never new shares.

	1 LAYER 1 Seed	2 LAYER 2 Venture	3 LAYER 3 Growth
Ticket	€100K–€1.5M, the only equity round, loan line reserved	€1.5M–€5M, first cheque or buyback, loan line reserved	€5M–€10M from the fund, up to €15M with SPVs
Stage	Pre-seed / seed	Seed+ / Series A	Series B and beyond
Role	Lead + radar tickets	Direct at the inflection, or buyback of angels and leavers	Direct: blocks from end-of-life funds and fresh growth rounds. Our breakouts: blocks bought in our winners
Entry post	€5M–€20M	€25M–€80M	€80M–€400M
Companies	10 leads + 40 radar	7 direct entries, €2M–€4M first cheques	5 direct entries + 1 of our breakout, €5M–€7M each
Invested, loans included	€21.5M	€29.5M	€33.0M
Target gross	**7.6× MOIC**	**3.0× MOIC**	**1.8× MOIC, 27% gross IRR over 2–4 year holds**

KEY TERMS

Closed-ended EuVECA fund (Lux.)	**10 years**
Successive closings	**24 months**
Management fee, years 1–5	**2%**
On the loan sleeve, years 1–5	**1%**
Then, on invested capital incl. loans until repaid	**1.5%**
Carried interest, European	**20%**
Hurdle, with GP catch-up	**8%**
Per company: fund / with SPVs	**€10M / €15M**
Loans	**Up to 30% of commitments (EuVECA)**

CAPITAL ALLOCATION

First cheques, incl. fresh growth rounds	**€45.2M**
Buybacks and follow-ons	**€28.8M**
Loans	**€10.0M**
Invested (46% after the first cheque)	**€84.0M**
Management fees	**€11.9M**
Fund expenses, incl. set-up	**€3.9M**
Contingency	**€200K**
Total commitments	**€100.0M**

EVERYONE WINS

Our stake rises with the founder's: every buyback and cancellation lifts both. We never need the founder to dilute, to raise or to chase a unicorn, and he never needs to fight us on an exit.

The only one who loses is the VC who would have sold rounds B, C and D.

AT A €250M EXIT	VC PATH	PROFUND PATH
Founders	€62M	**€119M**
Series A investor, equity multiple	2.9×	**5.5× (ProFund)**
Angels	Wait for the exit	**Liquidity at year 2**
LPs	Need a unicorn	**2.7× net and 27% IRR target, no exit above €300M**

Conflicts and fallback. Every buyback is priced by an independent valuer. ProFund's votes are excluded from any decision that involves ProFund, and conflicts go to the LP advisory committee. In case of fraud or gross misconduct, the voting agreement ends.

OUR EDGE

Two autonomous AI engines.

We run on what we back.

The Deal Engine

Follow live deal flow →

Scores every company against our thesis and flags inflection points before they become consensus. Autonomously detects the right targets for our portfolio companies, and the angels, leavers and early funds ready to sell.

POWERS ProFund · Proplace · Portfolio companies

The Growth Engine

Autonomous AI agents running content, inbound, and outbound end-to-end. They operate our fund and companies today and can be plugged directly into the founders we back tomorrow.

POWERS ProFund · Proplace · Maximum Insurance · Sosuites · Portfolio companies

THE TEAM

Built for this model: M&A, LBO, VC.

Alexandre Busson

Founding Partner

- M&A Director, Leboncoin
- Senior Associate, Partech Ventures
- LBO Analyst, Ardian (ex-AXA PE)
- Key Account Manager assistant, Google
- Founder / Investor, Dreamzer Games
- Owner and CEO, Fadparis.com

A partner from venture debt will run the loan book (to be recruited).

Investment committee and key-person clause.

TRACK RECORD, PRIOR TO THE FUND

Deal-01, exited 2007 — 10.0×
Entry 2006, 100% owned. Full exit in 2007.

Deal-02, exited 2014 — 20.0×
Entry 2008 at 100%. Sold down to 40%, then full exit in 2014.

Deal-03, LBO exit 2025 — 19.0×
Seed ticket €200K at €5.3M in 2014. LBO exit in Feb 2025 at €100M. Sourced 14 months before public announcement.

Deal-04, acquired 2016 — –
100% acquisition, €45M buyout. Revenue growing ~20% YoY since acquisition.

Companies anonymised. Names and references on request.

PROOF OF WORK

We live what we back.

ProFund and the companies below are operated almost entirely by our in-house engines and agents:

Proplace
Autonomous AI operating system for corporate development & M&A.

MAXIMUM INSURANCE
Travel insurance and duty of care for companies and their teams abroad.

SOSUITES.
AI-assisted personalised art prints to share.

SAME COMPANY, SAME EXIT

EXIT	FOUNDERS, VC PATH	FOUNDERS, PROFUND PATH	SERIES A INVESTOR, VC PATH	PROFUND, EQUITY
€100M	€0	**€38M**	0.7×	**1.8×**
€250M	€62M	**€119M**	2.9×	**5.5×**
€500M	€153M	**€254M**	7.1×	**11.8×**

Typical European path: €2M seed, €10M Series A, then €135M of equity across Series B to D, with 1× non-participating preferences. ProFund path: same seed and Series A, then €25M of loans. Illustrative, not a forecast.

FUND SIMULATION

Line-by-line entry, buybacks, loans & exit.

Target case, every position of the three layers. Ownership at exit is higher than at entry on every line where the founder grows with us: buybacks and cancellations lift our stake with his.

DEAL ID	STATUS	FIRST CHEQUE	BUYBACKS	FOLLOW-ON	LOAN	ENTRY STAKE	STAKE AT EXIT	EXIT VALUE	FUND RETURN	MOIC
LAYER 1 · SEED	50 companies: 10 leads (S-01 to S-10) + 40 radar tickets (S-11 to S-50), entries years 1–3

	Subtotal Venture	**€19.5M**	**€2.5M**	**€1.5M**	**€6.0M**	–	–	–	**€88.8M**	**3.0×**
LAYER 3 · GROWTH	€5M–€7M per position: blocks bought from end-of-life funds at a 30% discount, fresh growth rounds, and a block in our own breakout; entries years 3–5, exits 2–4 years later									
G-01	Strategic exit, block bought from an end-of-life fund	–	€5.0M	–	€2.0M	4.8%	4.8%	€300M	**€16.8M**	**2.4×**
G-02	Fresh growth round (new shares)	€6.0M	–	–	–	3.4%	3.4%	€300M	**€10.2M**	**1.7×**
G-03	Block bought from an end-of-life fund	–	€5.0M	–	–	7.1%	7.1%	€180M	**€12.8M**	**2.6×**
G-04	Fresh growth round, downside (preference)	€5.0M	–	–	–	3.3%	3.3%	€90M	€5.0M	**1.0×**
G-05	Block bought from an end-of-life fund, loss	–	€5.0M	–	–	6.0%	–	–	€1.0M	**0.2×**
G-06	Breakout (S-01): a seed fund's block bought back	–	€5.0M	–	–	4.8%	5.0%	€300M	**€15.0M**	**3.0×**
	Subtotal Growth	**€11.0M**	**€20.0M**	**–**	**€2.0M**	–	–	–	**€60.8M**	**1.8×**
	Total	**€45.2M**	**€26.3M**	**€2.5M**	**€10.0M**	–	–	–	**€313.6M**	**3.7×**

Fund return at exit value, equity plus loan repayment. Pact clause 9 (from year 6, the company can buy back up to a quarter of our stake, at a discount) is the company's option: it is not used in the target case. With it, the stress test below shows earlier cash.

FUND PERFORMANCE

Target returns, built line by line. Net of fees, expenses and carry.

27% Target net IRR
Base case 15%, stress case 8%

2.7× Target net TVPI
Base case 1.8×, stress case 1.4×

1.0× Net DPI by year 7
LPs get their capital back: loans and Growth exits return cash early

€300M Largest exit
No unicorn needed: S-01 returns the whole fund at €320M; at €1B, 4.5× and 37%

METRIC	TARGET	BASE	STRESS
Fund size	**€100M**	€100M	€100M
Gross proceeds, exits and loans	**€313.6M**	€195.3M	€136.8M
Net TVPI	**2.7×**	1.8×	1.4×
Net IRR	**27%**	15%	8%
Net DPI by year 6	**0.6×**	0.4×	0.3×
Net DPI by year 7	**1.0×**	0.6×	0.5×
Loans: repaid ÷ lent	**1.18×**	1.05×	0.79×
Largest exit	**€300M**	€180M	€120M

STRESS TEST, TARGET CASE	NET TVPI	NET IRR
Every exit one year later	2.7×	21%
Best company (S-01, both lines) becomes a zombie	2.0×	20%
30% more losses on every loan	2.7×	26%
With partial liquidity: five winners sell 25% in year 6 (clause 9)	2.6×	27%
One unicorn: S-01 sold for €1B	4.5×	37%

Net = after management fees (2% on commitments for 5 years, 1% on the loan sleeve, then 1.5% on invested capital, loans included until repaid), fund expenses and carried interest (20% over an 8% hurdle, European whole-of-fund waterfall with GP catch-up), before tax. Investments over 5 years, exits from year 5 to year 9. Base: every exit value ×60%. Stress: every exit value ×40%. Loans priced at 12% a year on healthy companies (1.12× to 1.40× by tenor, no warrants), drawn in tranches; zombies repay 0.8×, plus 5%, 15% and 35% further losses on every loan by case. Buybacks priced 5%–10% below the valuation of the time on winners and angels, 30% below from structural sellers (end-of-life funds). When a founder raises elsewhere, ProFund follows in new shares (S-02, V-02). G-02 and G-04 are fresh growth rounds in new shares; every first cheque carries a 1× non-participating preference. G-06 is a block bought in S-01, counted as one company with it. Zombies return 0.5× of the equity invested. Any growth position can be topped up to €15M with SPVs, outside the fund. Net TVPI on paid-in capital. Loan recycling not included. Targets are model outputs, not a forecast or a guarantee.
