ProFund builds and invests in AI-native companies

Seed to growth. One fund. Europe.

PRE-MARKETING PHASE

This document is a pre-marketing communication within the meaning of Article 4a of Regulation (EU) No 345/2013 (EuVECA). The fund is not yet established and no units may be subscribed at this stage. For professional and eligible investors only.

IN ONE SENTENCE

A EUR 100M European fund, seed to growth: we read every seed round and back what goes exponential.

Domain-specific AI harnesses with self-improving loops, built by teams that pilot AI agents.

OUR EDGE **We run on what we back: two in-house AI engines, one GP and his agents.**

INVESTMENT

Deal Engine

Reads every European seed round, every senior hire and every launch, around the clock. It scores each founder against our thesis and flags the inflection point before it becomes obvious.

POWERS **ProFund**

OPERATIONS

Growth Engine

AI agents that run content, inbound and outbound, end to end. They operate the fund and the GP's companies today, and they work for the founders we back.

POWERS **ProFund**, Proplace, Maximum Insurance, Sosuites

Target: one fund returner and a year-6 secondary sale of 25% of the two largest winners at 60% of exit value. Model outputs, not a forecast.

STRATEGY

VISION An age of abundance is starting. With AI, a handful of people can build what once took thousands, and founders who direct AI agents will realise their ambitions in record time. We believe AI will first free humanity from material needs, then give people time for what matters most.

ONE FUND AI-native companies go from seed to growth in months. One fund follows them from EUR 150K to EUR 15M per company, just before the exponential. It uses AI everywhere; its capital goes first to the people who get the most leverage out of AI.

WE LIVE IT One GP and a team of AI agents run the fund and three companies: we live what we back.

WHAT WE BACK - OUR FUND THESIS

01 FOUNDERS Exceptional, highly technical founders, found before their first round. At seed, we lead.

02 SEED RADAR Every European seed round of the last 24 months, re-scored on dated growth signals.

03 INFLECTION We double down when the curve bends: ARR x3 in 12 months, record revenue per employee.

04 RETURNERS Category leaders in Europe with global ambition, TAM above EUR 10B, winner-take-most.

05 AUTONOMY Self-improving AI loops at the core; small teams that pilot agents with maximum leverage.

HOW WE SOURCE

DEAL ENGINE 25+ in-house engines read weak signals daily (GitHub, tier-1 departures, job posts, alumni networks), plus warm introductions from top-tier founders and VCs. A memo and a model for every match, human time for the top 1 percent. Third-party EuVECA manager; GP commitment of at least 1% in cash.
