Backing AI-native teams building self-improving AI systems.

Pre-seed to Growth. €100M.

We don't fund headcount. We back the clearest minds directing the most autonomous machines, in the world's largest markets.

The terms the best founders negotiate, from their first cheque. Seed to Series B, SPVs for the largest rounds. Every fund says founders come first: we wrote it down.

✓ EuVECA fund

PRE-MARKETING PHASE

This document is a pre-marketing communication within the meaning of Article 4a of Regulation (EU) No 345/2013 (EuVECA). The fund is not yet established and no units may be subscribed at this stage. For professional and eligible investors only.

THE MANIFESTO

The end of human friction.

For two centuries, scaling a company meant scaling human labor, hiring thousands of people to execute the vision of one. That era is over.

Today, a tight-knit team that knows how to challenge, direct, and iterate with AI can architect an integral, self-improving system in record time. AI frees humanity from mechanical execution, returning creation to pure thought.

The future doesn't belong to the largest organizations. It belongs to the clearest minds directing the most autonomous machines.

Capital is no longer scarce. Control is. A team that doesn't need an army doesn't need a round every 18 months. So we don't sell it one: we lend, we buy, and equity comes only when the founder chooses.

WHAT WE BACK

Four laws drive our thesis and our engines every morning.

01

Visionary founders

We back obsessive visionaries from Day 1. Founders who don't build org charts, but iterate directly with AI until the machine mirrors their exact ambition.

02

Self-improving systems

We look for closed-loop architectures. Products that don't just automate a task, but compound in intelligence, precision, and autonomy with every single run.

03

Maximum impact. Minimum headcount.

We invest in integral systems solving massive, painful problems in the world's largest markets, operated with near-zero marginal labor.

04

Fund-returning physics

Every check we write backs a company built to dominate its category globally and return our entire €100M fund.

HOW WE BACK THEM

The founders' pact.

The same for every company, and public.

- **Equity, when the founder chooses.** At most a 1× non-participating preference; never a pushed round.
- **An in-house Chief Fundraising Officer.** Loans to raise from strength, then equity on the same terms when the founder asks and our committee agrees.
- **Buybacks and cancellations.** We buy out angels, leavers and early funds, with the founder's agreement, and the company can cancel shares every year: each cancellation lifts both stakes.
- **Founder control.** Our shares vote with the founder. One board seat, no veto on how they run, raise or sell.
- **Capital protected.** No sale below our money back without us, loans on lender terms, founder lock-up and vesting. Protections wake up on default.

€100M	3 layers	46%	Every	6–18mo
Target Fund I, closed-ended, closings over 24 months	Seed, Venture, Growth: €100K to €10M per company	Invested after the first cheque: follow-ons, buybacks, loans	European seed round tracked by the Seed Radar, weekly	Detection lead before announcement

profund.vc

alexandre@profund.vc

FUND CONSTRUCTION

Two ways in at every layer: a first equity cheque, or a buyback of existing shares. Then credit first, equity when the founder asks.

	1 LAYER 1 Seed	2 LAYER 2 Venture	3 LAYER 3 Growth
Ticket	€100K–€1.5M, first cheque, loan line reserved	€1.5M–€5M, first cheque or buyback, loan line reserved	€5M–€10M from the fund, up to €15M with SPVs
Stage	Pre-seed / seed	Seed+ / Series A	Series B and beyond
Role	Lead + radar tickets	Direct at the inflection, or buyback of angels and leavers	Direct: blocks from end-of-life funds and fresh growth rounds. Our breakouts: blocks bought in our winners
Entry post	€5M–€20M	€25M–€80M	€80M–€400M
Companies	10 leads + 40 radar	7 direct entries, €2M–€4M first cheques	5 direct entries + 1 of our breakout, €5M–€7M each
Invested, loans included	€21.5M	€29.5M	€33.0M
Target gross	**9.3× MOIC, 15.3× in the upside**	**2.2× MOIC, 3.5× in the upside**	**1.8× MOIC, 20% gross IRR over 2–4 year holds**

KEY TERMS

Closed-ended EuVECA fund	**10 years**
Successive closings	**24 months**
Management fee, years 1–5	**2%**
On the loan sleeve, years 1–5	**1%**
Then, on invested capital incl. loans until repaid	**1.5%**
Carried interest, European	**20%**
Hurdle, with GP catch-up	**8%**
Per company: fund / with SPVs	**€10M / €15M**
Loans	**Up to 30% of commitments (EuVECA)**

CAPITAL ALLOCATION

First cheques, incl. fresh growth rounds	**€45.2M**
Buybacks and follow-ons	**€28.8M**
Loans	**€10.0M**
Invested (46% after the first cheque)	**€84.0M**
Management fees	**€11.9M**
Fund expenses, incl. set-up	**€3.9M**
Contingency	**€200K**
Total commitments	**€100.0M**

EVERYONE WINS

Our stake rises with the founder's: every buyback and cancellation lifts both. We never push for a new round, and every share a company does not issue protects the founder's stake and ours.

All that disappears is the equity nobody needed to sell.

AT A €1B EXIT	VC PATH	PROFUND PATH
Founders	€114M	**€128M on the same capital, €202M on half of it, €364M on credit alone**
Series A investor, equity multiple	6.1×	**6.8×, 10.8× and 19.4× on the same paths (ProFund)**
Angels	Wait for the exit	**Liquidity at year 2**
LPs	A unicorn, diluted round after round	**2.8× net and 24% IRR target, 4.4× in the upside; the unicorn grows on credit, 31.3% owned at exit; 1.8× if it also sells €199M of equity**

Conflicts and fallback. Every buyback is priced by an independent valuer. ProFund's shares abstain on its own loans and buybacks; founder pay beyond budget, related-party deals and buybacks of founder shares need our director's approval. Fund-side conflicts go to the LP advisory committee. Fraud, gross misconduct, a material breach of the pact, a loan default not cured within 30 days or insolvency end the voting agreement and restore a classic lead's consents.

EuVECA pre-marketing communication, eligible investors only. Not an offer to subscribe. Contact: alexandre@profund.vc

OUR EDGE

Two autonomous AI engines.

We run on what we back.

The External AI Growth Engine

Scores every company against our thesis and flags inflection points before they become consensus. For our founders, it sources, assesses and qualifies every day the startups that could create the strongest synergies with their company.

POWERS ProFund · Proplace · Portfolio companies

Follow live deal flow →

The Internal AI Growth Engine

Autonomous AI agents running content, inbound and outbound. For our founders: a daily feed of LinkedIn and X posts and of intent-based leads with personalised sequences, ready to approve.

POWERS ProFund · Proplace · Maximum Insurance · Sosuites · Portfolio companies

THE GP

Alexandre Busson

Founding Partner

- M&A Director, Leboncoin
- Senior Associate, Partech Ventures
- LBO Analyst, Ardian (ex-AXA PE)
- Key Account Manager assistant, Google
- Founder / Investor, Dreamzer Games
- Owner and CEO, Fadparis.com

A partner from venture debt will run the loan book (to be recruited).

Investment committee and key-person clause.

TRACK RECORD, PRIOR TO THE FUND

Deal-01, exited 2007 — 10.0×
Entry 2006, 100% owned. Full exit in 2007.

Deal-02, exited 2014 — 20.0×
Entry 2008 at 100%. Sold down to 40%, then full exit in 2014.

Deal-03, LBO exit 2025 — 19.0×
Seed ticket €200K at €5.3M in 2014. LBO exit in Feb 2025 at €100M. Sourced 14 months before public announcement.

Deal-04, acquired 2016 — –
100% acquisition, €45M buyout. Revenue growing ~20% YoY since acquisition.

Companies anonymised. Names and references on request.

PROOF OF WORK

We live what we back.

ProFund and the companies below are operated almost entirely by our in-house engines and agents:

Proplace
Autonomous AI operating system for corporate development & M&A.

MAXIMUM INSURANCE
Travel insurance and duty of care for companies and their teams abroad.

SOSUITES.
AI-assisted personalised art prints to share.

	Subtotal Growth	**€11.0M**	**€20.0M**	**–**	**€2.0M**	–	–	–	**€95.8M**	**2.9×**
	Total	**€45.2M**	**€26.3M**	**€2.5M**	**€10.0M**	–	–	–	**€528.8M**	**6.3×**

Fund return at exit value, equity plus loan repayment.

FUND PERFORMANCE

Target returns, built line by line. Net of fees, expenses and carry.

24% Target net IRR
Upside 36%, stress case 15%

2.8× Target net TVPI
Upside 4.4×, stress case 2.0×

0.5× Net DPI by year 7
Loans and Growth exits bring cash back early; the unicorn sells in year 9

€320M One company returns the fund
A €320M sale of S-01 returns it alone; at its modelled €1B, 3.1×. Without it, 1.4× net

METRIC	TARGET	UPSIDE	STRESS
Fund size	**€100M**	€100M	€100M
Gross proceeds, exits and loans	**€324.9M**	€528.8M	€223.7M
Net TVPI	**2.8×**	4.4×	2.0×
Net IRR	**24%**	36%	15%
Net DPI by year 6	**0.4×**	0.6×	0.3×
Net DPI by year 7	**0.5×**	0.7×	0.4×
Loans: repaid ÷ lent	**0.97×**	1.08×	0.73×
Largest exit	**€600M**	€1B	€400M

STRESS TEST, TARGET CASE	NET TVPI	NET IRR
Every exit one year later	2.8×	19%
No unicorn: S-01 (both lines) becomes a zombie	1.4×	8%
The unicorn also sells €85M of equity	2.1×	18%
The unicorn also sells €199M of equity	1.8×	15%
30% more losses on every loan	2.8×	23%
Two unicorns: V-01 also modelled at €1B	3.1×	26%
A bigger unicorn: S-01 modelled at €2B	4.3×	33%

Net = after management fees (2% on commitments for 5 years, 1% on the loan sleeve, then 1.5% on invested capital, loans included until repaid), fund expenses and carried interest (20% over an 8% hurdle, European whole-of-fund waterfall with GP catch-up), before tax. Investments over 5 years, exits from year 5 to year 9. Target: every exit at 60% of its modelled value. Upside: modelled values. Stress: every exit at 40%. Loans priced at 12% a year on healthy companies (1.12× to 1.40× by tenor, no warrants), drawn in tranches; zombies repay 0.8×, plus 15%, 5% and 35% further losses on every loan in the target, upside and stress cases. Buybacks priced 5%–10% below the valuation of the time on winners and angels, 30% below from structural sellers (end-of-life funds). When a founder raises elsewhere, ProFund follows in new shares (S-02, V-02). G-02 and G-04 are fresh growth rounds in new shares; first cheques carry a 1× non-participating preference, outside small seed rounds. G-06 is a block bought in S-01, counted as one company with it. Zombies return 0.5× of the equity invested. Any growth position can be topped up to €15M with SPVs, outside the fund. Net TVPI on paid-in capital. Loan recycling not included. Targets are model outputs, not a forecast or a guarantee.
