

ProFund builds and invests in AI-native companies

Early-stage venture capital. Paris first, then Europe.

PRE-MARKETING PHASE

This document is a pre-marketing communication within the meaning of Article 30a of Directive 2011/61/EU (AIFMD). The fund is not yet established and no units may be subscribed at this stage. Addressed to professional investors only.

IN ONE SENTENCE

A EUR 35M early-stage fund investing in 21 European companies. Investors and builders: we built and scaled companies first, and we extend that operating experience to investment - with a platform that reads every weak signal in an emerging category, six to eighteen months before it is obvious.

FUND CONSTRUCTION

Two tiers. Scout tickets buy asymmetric exposure at pre-seed, where the detection lead is worth the most. Core tickets concentrate capital on validated conviction at Seed+ and Series A. The best Scout bets graduate to Core.

SCOUT PORTFOLIO

EUR 150K per deal, 12 deals

- Pre-seed, entry at EUR 4M - 6M post-money.
- EUR 1.8M initial + EUR 7.5M follow-on reserved.
- 3 of 12 graduate to Core at Seed+ validation.
- Target 2.5x MOIC - EUR 23.7M exit value.

CORE PORTFOLIO

EUR 1.1M per deal, 9 deals

- Seed+ / Series A, entry at EUR 25M - 35M pre-money.
- EUR 9.9M initial + EUR 14M follow-on reserved.
- Co-investing alongside Tier 1 leads.

STRATEGY

- Paris first, then Europe. Early-stage only, from pre-seed to Series A.
- The thesis is recalibrated weekly: detection parameters are updated every Monday.
- Human time is reserved for the top 1% of signals. Every other signal is processed automatically, and the reason it was discarded is written down.
- A full investment memo and financial model are generated automatically for every high-conviction match.
- Fund administration fully externalised. Reporting automated, daily and weekly.
- 5% GP commitment on management fees. No investment committee on Scout decisions - one person accountable.

HOW WE SOURCE

Every signal is matched against the active themes, then qualified automatically against dozens of green and red flags weighted by their historical predictive accuracy. Only the top 1% surfaces as a CALL - the single verdict that requires human attention.

- SSL certificate registrations, Pappers legal filings, GitHub repositories.
- LinkedIn job posts, Crunchbase API, semantic search, Google Alerts.
- VC portfolio additions and grandes ecoles alumni networks.
